

**Street Drum Corps is a high-energy, interactive, educational, street drumming experience:**

- Perform songs with actual recycled materials from trash cans to vehicle parts
- Explain the creative process of how we make songs and rhythm
  - Educate the audience through performance about the creation process of music
  - Open up the discussion floor to answer questions about the music and group
  - Explain how each member of SDC started playing music and what inspired him or her
- Explain and demonstrate that music surrounds us everywhere we live
  - Choose different pieces from the room and make music with found objects that are in the environment
- Demonstrate different ways to make sounds by choosing audience members and guiding them through musical experiences
  - Interact with the entire audience by teaching the group how to create sounds with their own body
- Inspire the audience to achieve their dreams, goals and aspirations
  - Become a positive role model for all
